INFORMATION DISCLOSURE STATEMENT
UNDER 37 C.F.R. §§ 1.56, 1.97, and 1.98

Applicants are submitting this Information Disclosure Statement pursuant to 37 C.F.R. §§ 1.56, 1.97, and 1.98 to disclose to the U.S. Patent and Trademark Office the patents, publications, applications, and/or other references listed on the enclosed, completed PTO-1449 form(s). The filing of this Information Disclosure Statement should not be construed as a representation that a search has been made or as an admission that the listed references are prior art for this application. Applicants respectfully request that the listed references be expressly considered during prosecution of the application, and that the references be made of record therein and appear among the "references cited" on any patents issuing therefrom.

CONTENT OF DISCLOSURE

This Information Disclosure Statement includes (1) 1 page of a PTO-1449 form, and (2) a legible copy of each foreign and non-patent reference, if any, listed on the form. However,

because this application was filed on or after July 1, 2003, no copies of U.S. patents or published U.S. patent applications are included.

FOREIGN-LANGUAGE REFERENCES

A concise explanation of the relevance of each listed reference not in the English language follows:

Japanese Patent No. 2002364337: This patent purports to disclose to provide an exhaust emission control device capable of improving a flow of exhaust gas in a flow passage switching valve, and drastically reducing pressure loss.

Each communication port 17, 18 opening to both right and left sides of a flow passage switching portion of a main pipe 13 is directed in the axial direction (a right and left direction in Fig. 1) of the main pipe 13, and expanded so as to be larger than the inner diameter d of communication pipe 11, 12 and not more than 1.5 times the inner diameter D of the main pipe 13. Therefore, when exhaust gas 2 returning through a particulate filter turns back in a flow passage switching valve 10, the minimum flow passage cross section restricted between a rearmost portion of the communication port 17 and a valve element 19 of the flow passage switching valve 10, is more expanded than before so that a backward turning flow of the exhaust gas 2 is improved to drastically reduce the pressure loss.

TIMING OF DISCLOSURE / FEE INFORMATION

This Information Disclosure Statement is being filed, to the best of the undersigned's knowledge, either (1) before the mailing of a first Office action on the merits, or (2) before the mailing of a first Office action after the filing of a request for continued examination under 37 C.F.R. § 1.114. Moreover, in accordance with 37 C.F.R. § 1.97(e)(1), the undersigned states that each item of information contained in this Information Disclosure Statement was first cited in a

communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of this Information Disclosure Statement. Therefore, in accordance with 37 C.F.R. §§ 1.97(b)(3), (b)(4), or (c)(1), no fee is required.

Please contact the undersigned with any questions or comments regarding this Information Disclosure Statement.

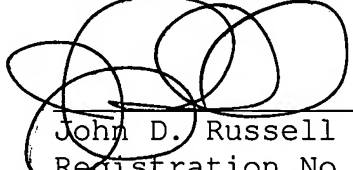

CERTIFICATE OF MAILING

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450, on March 30, 2004.
